

## Testimonial Scoot and Ice Man

When I purchased Scoot he was sour and naughty and had trust issues. I spent a lot of time riding him out checking cows and gaining his trust. During training he had become sore and during his time off Kris worked with him. Later I noticed his soreness fade and after more treatments his mind was focused. Our slow times turned into winning times and finished winning a buckle at the SDBRA finals.

Ice Man was purchased with back issues and with that came bucking issues. He spooked at everything then would try and dumped me. Over a year of slow riding and trust building and Kris working with him he is a different horse. He rides out unafraid and this winter I was even able to have him pull kids in a sled. His turn around has been amazing!
